
Single Mode Connectorized Laser Diode (Low Power)

Technical Data

LST0605-FC-A

Features

- **1300 nm Single Mode**
- **Hermetic Construction**
- **Industry Standard FC Connector**
- **Low Threshold Current**
- **Integral InGaAs PIN Monitor Photodiode**
- **High Reliability**
- **Connectorized for Ease of Use**

Description

The LST0605-FC-A series has been developed for low cost, coolerless low power single mode applications using the FC style connector. Both the buried heterostructure laser and the monitor photodiode are manufactured using the Hewlett-Packard MOVPE process.

Applications

- **Fiber Optic Laser Transmitter**
- **Instrumentation**
- **Subscriber Loop Communications Systems**
- **Low Cost Single Mode Fiber Systems**
- **SM-FDDI**
- **E-O Convertors**

Laser Safety Warning

This device is a Class IIb (3b) Laser Product. It may emit invisible laser radiation from an open optical port. To avoid possible eye damage do not look into an open optical port during laser operation. Do not exceed specified operating limits.

Absolute Maximum Ratings

Absolute maximum limits mean that no catastrophic damage will occur if the product is subjected to these ratings for short periods, provided each limiting parameter is in isolation and all other parameters have values within the performance specification. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time.

Parameter	Minimum	Typical	Maximum	Units

Single Mode SC Connectorized Laser Transmitter Module

Technical Data

LST062X-SC-A

Features

- **1300 nm Single Mode**
- **Industry Standard SC Connector**
- **High Reliability**
- **Connectorized for Ease of Use**
- **Convenient Variety of 4 Pin Configurations**
- **Hermetic Construction**
- **Wide Operating Temperature -40°C to +85°C**
- **Modulation Capability up to 622 Mbit/s**
- **SONET SR/IR up to OC12 SDH STM1 and 4 Compliant**
- **Laser Eye Safety Classifications:
CDRH Class 1 Compliant
IEC825-1 Class 3A**
- **200 μ W Fiber Coupled Power**

Applications

- **Telecommunications**
- **Fiber in the Loop**
- **Inter/Intra Office**
- **SONET/SDH**
- **Datacommunications**
- **Switches**

Description

The LST062X-SC-A series is a laser transmitter, operating in the 1300 nm wavelength region. It is designed for use in short and medium distance networks with bit rates up to 622 Mbit/s.

The device features a high reliability laser diode and a monitor photodiode in a hermetic package. These are electrically connected to four pins in an industry-standard configuration.

Environmental performance is designed to be compatible with the requirements of Bellcore's TA-NWT-000983 document.

Options within the LST062X-SC-A family offer several 4 Pin configurations with pin rotational

orientations designed to match existing products available on the market.

If the specific arrangement or performance you require is not listed, please contact your local representative as our highly flexible design and manufacturing processes allow both physical and electro-optical customization to meet your needs.

Laser Safety Warning

This device is a Class IIIa (3A) Laser Product. It may emit invisible laser radiation from an open optical port. To avoid possible eye damage do not look into an open optical port during laser operation. Do not exceed specified operating limits.
