

Structure Silicone monolithic integrated circuit

Product name Audio sound processor for TV

Model Type **BD3886FS**

●Features

1. Built-in BBE processor clarifying voice sound
2. I²C BUS control with the control voltage of 3.3V-5.0V
3. Use the Bi-CMOS process

●Absolute Maximum Ratings (Ta=25°C)

Parameter	Symbol	Limits	Unit
Applied Voltage	VCC	10.0	V
Input Voltage	VIN	VCC+0.3~GND-0.3	V
Power Dissipation	Pd	1190*1	mW
Operating Temperature	Topr	-40~+85 *2	°C
Storage Temperature	Tastg	-55~+150	°C

*1 At Ta=25°C or higher, this value is decreased to 9.5mW/°C.

When Rohm standard board is mounted. Thermal resistance $\theta_{ja} = 105 (^{\circ}\text{C}/\text{W})$.

Rohm standard board: size: 70×70×1.6 (mm³)

material: FR4 glass-epoxy substrate (copper foil area: not more than 3%).

*2 As long as voltage stays within operating voltage range, certain circuit operation is guaranteed in the operating temperature range.

Allowable loss conditions are related to temperature, to which care must be taken.

In addition though the standard value of its electrical characteristics cannot be guaranteed under the conditions other than those specified, original functions are maintained.

●Operating Voltage Range

Parameter	Symbol	Min.	Typ.	Max.	Unit
Power supply voltage *3	VCC	7.0	9.0	9.5	V

Basic operation shall be available at Ta=25°C.

*3 As long as temperature components must be set in accordance with the operating voltage and temperature ranges before using this IC.

In addition, though the standard value of its electrical characteristics cannot be guaranteed under the conditions other than those specified, original functions are maintained.

■ License Agreements for Patent and Trade Mark

BBE is the trade mark of BBE Sound Inc. The supply and sales of BD3886FS is limited to the parties to which the use of Patents and Trade Marks is permitted. For the inquiry for the use right of trade mark and patent, contract BBE Inc. directly at the following address.

BBE Sound Area Manager (Japan), Mr. Tetsuro Sato

1-29-5-502 Higashi Ayase, Adachiku, Tokyo Telephone: 03-5697-4280, Fax: 03-5697-4281

●Function

Function	Specifications
AGC	4 step suppression level variable
Front volume	0dB to -87dB (1dB step), -∞dB
Surround	Stereo Surround
Bass	±14dB (2dB step)
Treble	±14dB (2dB step)
BBE	Process control : 1 ~ 10 dB Contour control : 1 ~ 10 dB
Rear volume	0dB ~-20dB (2dB step), -25dB, -30dB, -45dB, -60dB, -∞dB (With the independent control)

●Electrical characteristics

Unless specified: Ta=25°C, VCC=9V, f=1kHz, VIN=1Vrms, Rg=600Ω, RL=10kΩ, Front Volume 0dB, Rear Volume =0dB, Bass=0dB, Treble=0dB, AGC=OFF, SURROUND=OFF;BBE=OFF.

Parameter	Symbol	Limits			Unit	Conditions
		Min.	Typ.	Max.		
Current upon no signal	IQ	—	8	20	mA	Vin=0Vrms
Maximum input voltage	VIM1	2.6	2.8	—	Vrms	Front Volume = -6dB THD(Vout)=1% BPF=400-30KHz
Maximum output voltage	VOM1	2.2	2.5	—	Vrms	THD=1% BPF=400-30KHz
Voltage gain	GV1	-2	0	2	dB	GV=20log(Vout/Vin)
Channel balance	CB	-1.5	0	1.5	dB	CB = GV1-GV2
Total harmonic distortion	THD1	—	0.008	0.1	%	Vout=500mVrms BPF=400-30KHz
Output noise voltage	VNO1	—	6	18	μVrms	BPF = IHF-A, Rg=0Ω
Residual noise voltage	VMNO1	—	1.5	10	μVrms	Front Volume = -87dB Rear Volume = -∞dB BPF = IHF-A, Rg=0Ω
Cross talk 1ch→2ch	CT12	70	80	—	dB	CT = 20log(Vin/Vout) BPF = IHF-A

●Cautions on use

- (1) Numbers and data in entries are representative design values and are not guaranteed values of the items.
- (2) Although we are confident in recommending the sample application circuits, carefully check their characteristics further when using them. When modifying externally attached component constants before use, determine them so that they have sufficient margins by taking into account variations in externally attached components and the Rohm LSI, not only for static characteristics but also including transient characteristics.
- (3) Absolute maximum ratings
If applied voltage, operating temperature range, or other absolute maximum ratings are exceeded, the LSI may be damaged. Do not apply voltages or temperatures that exceed the absolute maximum ratings. If you think of a case in which absolute maximum ratings are exceeded, enforce fuses or other physical safety measures and investigate how not to apply the conditions under which absolute maximum ratings are exceeded to the LSI.
- (4) GND potential
Make the GND pin voltage such that it is the lowest voltage even when operating below it. Actually confirm that the voltage of each pin does not become a lower voltage than the GND pin, including transient phenomena.
- (5) Thermal design
Perform thermal design in which there are adequate margins by taking into account the allowable power dissipation in actual states of use.
- (6) Shorts between pins and misinstallation
When mounting the LSI on a board, pay adequate attention to orientation and placement discrepancies of the LSI. If it is misinstalled and the power is turned on, the LSI may be damaged. It also may be damaged if it is shorted by a foreign substance coming between pins of the LSI or between a pin and a power supply or a pin and a GND.
- (7) Operation in strong magnetic fields
Adequately evaluate use in a strong magnetic field, since there is a possibility of malfunction.

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
