## Low Voltage/Low Saturation Stepping Motor Driver

### Features

- 3.3V and 5V MPU interface
- Dual H-bridge drivers for bipolar stepping motor drives
- Built-in vertical-PNP power transistors
- Wide supply voltage range( $V_{CC} = 2.5V \sim 7.0V$ )
- Low saturation voltage (0.4V@ 0.4A)
- Built-in chip enable function for each bridge
- Built-in shoot-through current protection
- Built-in thermal shutdown(TSD) function

### Description

The FAN8200/FAN8200D is a monolithic integrated circuit designed for two-phase stepping motor drive systems. It has dual H-bridge drivers with vertical-PNP power transistors. Each of the bridges has an independent enable pin, therefore it can be used for other applications as well as stepping motor drive systems.
