

MN3112SA

Vertical Driver for Video-Camera CCD Area-Image-Sensor

■ Overview

The MN3112SA is a vertical driver LSI incorporating four vertical driver channels and one sub driver channel for a 2-dimensional interline CCD image sensor.

The MN3112SA enables low current dissipation and the part reductions.

■ Features

- 3V power supply for input section

■ Applications

- Video cameras

■ Pin Assignment

■ Block Diagram

V_{DC}, V_L, GND : Common power supply

V_{M13}, V_{M24} : Binary and tristate independent power supplies for vertical driver section

V_{HH}, V_H : Independent power supplies for sub driver section and vertical driver section

■ Pin Descriptions

Pin No.	Symbol	Pin Name	I/O	Function Description
6	V_{DC}	Input section high-level power supply	I	5V high-level input
15	GND	Input section low-level power supply	I	5V low-level input
16	V_H	Vertical driver section high-level power supply	I	High-level input at high-voltage section
20	V_{HH}	SUB driver section high-level power supply	I	High-level input at high-voltage section
4 19	V_{M13} V_{M24}	Middle-level power supply	I	Middle-level input at high-voltage section Input externally to both V_{M13} and V_{M24} .
2	V_L	Low-level power supply	I	Low-level input at high-voltage section
9	IV2	Transfer pulse input	I	Charge transfer pulse input pin
12	IV4	Transfer pulse input	I	Charge transfer pulse input pin
7	IV1	Transfer pulse input	I	Charge transfer pulse input pin
14	IV3	Transfer pulse input	I	Charge transfer pulse input pin
8	CH1	Charge pulse input	I	Charge read pulse input pin
13	CH1	Charge pulse input	I	Charge read pulse input pin
10	ISUB	SUB pulse input	I	Unwanted charge sourcing pulse input pin
18	OV4	Binary transfer pulse output	O	Binary transfer pulse output pin (V_{M24} , V_L)
3	OV2	Binary transfer pulse output	O	Binary transfer pulse output pin (V_{M24} , V_L)
17	OV3	Tristate transfer pulse output	O	Tristate transfer pulse output pin (V_H , V_{M13} , V_L)
5	OV1	Tristate transfer pulse output	O	Tristate transfer pulse output pin (V_H , V_{M13} , V_L)
1	OSUB	SUB pulse output	O	Unwanted charge sourcing pulse output pin (V_{HH} , V_L)
11	N.C.	No connection	—

■ Application Circuit Example

Note *1: Connect a bypass capacitor as close as possible to each of the MN3112SA's power supply pins (V_{HH}, V_H, V_{M13}, V_{M24}, V_L, V_{DC}).

■ Package Dimensions (Unit: mm)

SSOP020-P-0225

■ Usage Notes

- (1) When the sub driver is not used
 1. Connect V_{HH} (pin 20) to V_H (pin 16).
 2. Connect ISUB (pin 10) to V_{DC} (pin 6) or GND (pin 15).
 3. Make no connection for OSUB (pin 1).
- (2) Connect a bypass capacitor as close as possible to MN3112SA power supply pins V_{HH} (pin 20), V_H (pin 16), V_{M13} (pin 4), V_{M24} (pin 19), V_L (pin 2), and V_{DC} (pin 6).
- (3) Guarantee period after unsealing

The guarantee period after opening the dry-sealed packaging is three weeks under the environment conditions of 30°C/70% (temperature/humidity).
- (4) The recommended reflow temperature is 230°C.

Request for your special attention and precautions in using the technical information and semiconductors described in this material

- (1) An export permit needs to be obtained from the competent authorities of the Japanese Government if any of the products or technologies described in this material and controlled under the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.
- (2) The technical information described in this material is limited to showing representative characteristics and applied circuit examples of the products. It does not constitute the warranting of industrial property, the granting of relative rights, or the granting of any license.
- (3) The products described in this material are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
 - Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
 - Any applications other than the standard applications intended.
- (4) The products and product specifications described in this material are subject to change without notice for reasons of modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.
- (5) When designing your equipment, comply with the guaranteed values, in particular those of maximum rating, the range of operating power supply voltage and heat radiation characteristics. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, redundant design is recommended, so that such equipment may not violate relevant laws or regulations because of the function of our products.
- (6) When using products for which dry packing is required, observe the conditions (including shelf life and after-unpacking standby time) agreed upon when specification sheets are individually exchanged.
- (7) No part of this material may be reprinted or reproduced by any means without written permission from our company.

Please read the following notes before using the datasheets

- A. These materials are intended as a reference to assist customers with the selection of Panasonic semiconductor products best suited to their applications.
Due to modification or other reasons, any information contained in this material, such as available product types, technical data, and so on, is subject to change without notice.
Customers are advised to contact our semiconductor sales office and obtain the latest information before starting precise technical research and/or purchasing activities.
- B. Panasonic is endeavoring to continually improve the quality and reliability of these materials but there is always the possibility that further rectifications will be required in the future. Therefore, Panasonic will not assume any liability for any damages arising from any errors etc. that may appear in this material.
