The TC74HC283A is a high speed CMOS 4 - BIT BINARY FULL ADDER fabricated with silicon gate C<sup>2</sup>MOS technology.

It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation. Sum ( $\Sigma$ ) outputs are provided for each bit and a resultant carry (C4) is obtained from the fourth bit.

This adder features full internal look - ahead across all four bits.

A4  $\times$  n bit binary adder is easily built up by cascading the HC283A without any additional logic.

All inputs are equipped with protection circuits against static discharge or transient excess voltage.
