

LB1964T

Fan Motor Single-Phase Full-Wave Driver

Overview

The LB1964T is a driver for single-phase bipolar drive fan motors that features compact and low-profile MSOP-8 package. Low-saturation output and low-voltage operation make it ideal for applications that require small size and high efficiency, such as notebook computers and CPU cooling fans.

Features

- Single-phase full-wave drive
- Low-voltage operation ($V_{CC} = 2.0V$ min.)
- Low-saturation output (upper side + lower side saturation voltage: V_{osat} (total) = $0.3V$ typ., $I_o = 100$ mA)
- Ultraminiature package ($3.0 \times 4.9 \times 0.93$ mm³)
- FG output
- Built-in thermal protection circuit

Package Dimensions

unit: mm

3245-MSOP8

Specifications

Absolute Maximum Ratings at $T_a = 25^{\circ}C$

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage	V_{CC} max		9	V
Allowable power dissipation	P_d max	With specified substrate*	370	mW
OUT output current	I_{OUT} max		0.3	A
OUT output withstand voltage	V_{OUT} max		9	V
FG output withstand voltage	V_{FG} max		7	V
FG output current	I_{FG} max		5	mA
Operating temperature	T_{opr}		-20 to +85	$^{\circ}C$
Storage temperature	T_{stg}		-55 to +150	$^{\circ}C$

* Specified substrate (20.0 × 10.0 × 0.8 mm³ paper phenol)

Allowable Operating Ranges at $T_a = 25^{\circ}C$

Parameter	Symbol	Conditions	Ratings	Unit
Power supply voltage	V_{CC}		2 to 8	V
Hall input common mode input voltage range	V_{ICM}		0.2 to $V_{CC}-1$	V

- Any and all SANYO products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your SANYO representative nearest you before using any SANYO products described or contained herein in such applications.
- SANYO assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO products described or contained herein.

LB1964T

Electrical Characteristics at Ta = 25°C, VCC = 3.3V, unless otherwise specified

Parameter	Symbol	Conditions	Ratings			Unit
			min	typ	max	
Current drain	Icc			3	4.5	mA
OUT output Low saturation voltage	VOL	IO = 100 mA		0.2	0.3	V
OUT output High saturation voltage	VOH	IO = 100 mA		0.2	0.3	V
Hall bias voltage	VHB	RH = 360Ω	1.17	1.27	1.37	V
Hall input sensitivity	VHN	Zero peak value		1	7	mV
FG output Low voltage	VFG	IFG = 3 mA		0.2	0.3	V
FG output leak current	I_FGL	VFG = 7V			30	μA
Thermal protection operating temperature	TTSD	Assured design target*	150	180	200	°C

* Assured design target: Target value, not measured individually

Sample Application Circuit

- *1 When a diode is used to protect the IC from destruction in case of reverse connection, the capacitor Cr must be inserted to provide a regenerative current route. Similarly, a capacitor is needed in the power supply line, even if no diode is used.
- *2 The Hall element is supplied with a constant-voltage bias of approx. 1.27V from the HB pin. This ensures stable output with good temperature characteristics from the Hall element. Because the LB1964T incorporates a Hall amplifier with low offset, it provides coil output with a stable duty.
- *3 The Hall amplifier does not have a hysteresis characteristic. The OUT1 and IN- pins are at the same phase, and by arranging the two pins next to each other, chatter during phase switching is prevented. However, if the wiring leading to the IN- pin is long, some noise interference may occur. In such a case, the following steps should be considered:
 - (1) Arrange parts layout with priority to proximity of Hall element and IC, to allow short Hall element output wiring.
 - (2) Insert a resistor of about 10 to 100 k Ω between OUT1 and IN- to create a hysteresis characteristic.

■ Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

■ SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.

■ In the event that any or all SANYO products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.

■ No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of SANYO Electric Co., Ltd.

■ Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO product that you intend to use.

■ Information (including circuit diagrams and circuit parameters) herein is for example only; it is not guaranteed for volume production. SANYO believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringements of intellectual property rights or other rights of third parties.
