Octal Buffers / Line Drivers with 3-state Outputs

REJ03D0114-0200

Rev.2.00

Mar. 03, 2005

Description

The RD74LVC541B has eight line drivers with three state outputs in a 20 pin package. When $\overline{G1}$ and $\overline{G2}$ is low level, this drivers set up output is enable. Low voltage and high-speed operation is suitable at the battery drive product (note type personal computer) and low power consumption extends the life of a battery for long time operation.
