

- STRUCTURE Silicon Monolithic Integrated Circuit
- TYPE **BU2098F**
- FUNCTION 8bit Serial IN / Parallel Out Driver
- FEATURES 1) Compatible with I²C BUS
 2) Nch open drain, capable of driving a maximum of 25mA
 3) 18V high voltage output can be used.

● ABSOLUTE MAXIMUM RATINGS (Ta=25°C)

Parameter	Symbol	Limit	Unit
Power Supply Voltage	V _{DD}	7.0*	V
Power Dissipation	P _d	300	mW
Operating Temperature Range	T _{opr}	-40~+85	°C
Storage Temperature Range	T _{stg}	-55~+125	°C
Input Voltage	V _{IN}	-0.5~ V _{DD} +0.5	V

* Output (Q0~Q7) are 18V (Max.)

• Status of this document

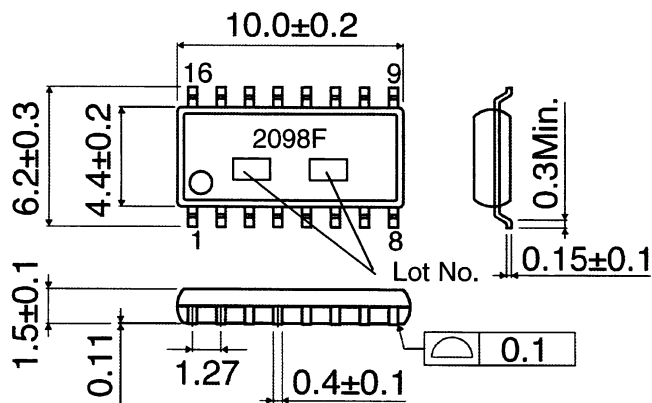

The Japanese version of this document is the formal specification. A customer may use this translation version only for a reference to help reading the formal version. If there are any difference in translation version of this document, formal version takes priority.

● ELECTRICAL CHARACTERISTICS (unless otherwise noted, Ta=25°C, VDD=5.0V)

Parameter	Symbol	Standard Value			Unit	Condition
		MIN	TYP	MAX		
Power Supply Voltage range	V _{DD}	2.7	-	5.5	V	VDD pin
Output Voltage range	V _o	0	-	15.0	V	
Supply current	I _{cc1}	-	-	2.0	μA	Static supply current
Input "H" voltage	V _{IH}	0.7	-	-	V/V	Ratio against VDD
Input "L" voltage	V _{IL}	-	-	0.3	V/V	Ratio against VDD
Output "L" voltage	V _{OL}	-	-	0.4	V	
Input "L" current	I _{IL}	-	-	2.0	μA	Vin=0
Input "L" current	I _{IH}	-	-	-2.0	μA	Vin=VDD
Output Leakage current	I _L	-	-	±5.0	μA	Output=OPEN, Vout=VDD
Data Minimum set up time	t ₁	100	-	-	nS	High speed mode
Data hold time	t ₂	-	-	900	nS	High speed mode
Minimum shift pulse width (High speed mode)	t ₃₁	0	-	400	KHz	
Minimum shift pulse width (normal mode)	t ₃₂	0	-	100	KHz	

This product is not assessed whether to be strategic materials in foreign exchange and trade law or not, so please confirm at trading. This product is not deigned against radioactive ray.

● PHYSICAL DIMENSIONS

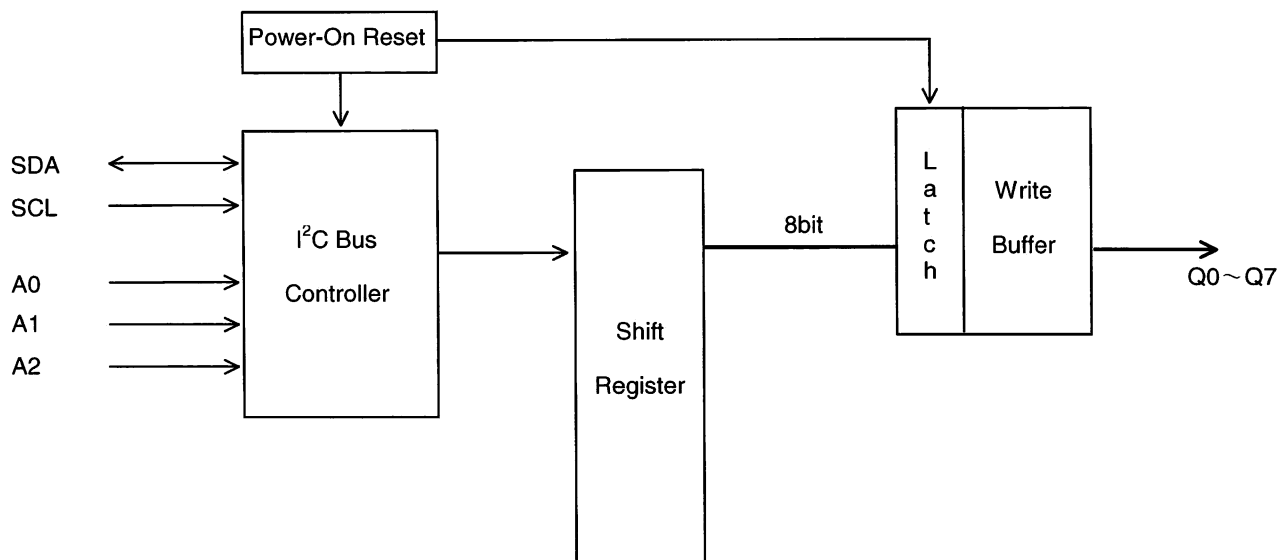

SOP16 (UNIT : mm)

● Pin Description

Pin. No	Terminal	Symbol	Function
14	SCL	C	Shift pulse for shift register
15	SDA	S _I	Data input for shift register, data is set at rising edge of shift pulse
1	A0	A ₀	Address input 0
2	A1	A ₁	Address input 1
3	A2	A ₂	Address input 2
4	Q0	O ₀	1st bit output, it becomes "1" when data in register is "1"
5	Q1	O ₁	2nd bit output, it becomes "1" when data in register is "1"
6	Q2	O ₂	3rd bit output, it becomes "1" when data in register is "1"
7	Q3	O ₃	4th bit output, it becomes "1" when data in register is "1"
9	Q4	O ₄	5th bit output, it becomes "1" when data in register is "1"
10	Q5	O ₅	6th bit output, it becomes "1" when data in register is "1"
11	Q6	O ₆	7th bit output, it becomes "1" when data in register is "1"
12	Q7	O ₇	8th bit output, it becomes "1" when data in register is "1"
13	NC	NC	NC pin
8	VSS	GND	GND
16	VDD	VDD	Power supply

● BLOCK DIAGRAM

● NOTES FOR USE

(1) Absolute maximum ratings

Exceeding the absolute maximum ratings, including applied voltage and operating temperature range, may damage or destroy the IC. Since the cause of the damage cannot be conclusively identified (as, for example, a short or open mode), be sure to take appropriate physical safety measures, such as incorporating fuses, whenever a special mode anticipated to exceed absolute maximum ratings is employed.

(2) Ground Potential

Make sure the potential for the GND pin is always kept lower than the potentials of all other pins, regardless of the operating mode.

(3) Thermal design

Provide sufficient margin in the thermal design to account for the allowable power dissipation (Pd) expected in actual use.

(4) Electromagnetic fields

Use in strong electromagnetic fields may cause malfunctions. Be careful operating in electromagnetic fields.

(5) Ground wiring pattern

When both a small-signal GND and high current GND are present, single-point grounding (at the set standard point) is recommended, in order to separate the small-signal and high current patterns, and to be sure the voltage change stemming from the wiring resistance and high current does not cause any voltage change in the small-signal GND. In the same way, care must be taken to avoid wiring pattern fluctuations in any connected external component GND.

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
