- For mounting on DIN-rail in accordance with DIN/EN 50 022
- 22.5 mm small Euronorm housing

Product Description

Small AC current metering transformer with 3 knob selectable ranges. Output from the transformer is 4-20 mADC in accordance with IEC 60381-1. Can be used with relays DIB01, PIB01, DIC01, PIC01 or S183 or directly

connected to a PLC. Power supply ON is indicated by a green LED.

12 mm hole for isolated current carrying wire makes it suitable for most applications. For mounting on DIN-rail or directly on surface by screws.

Mode of Operation

The E 82-20 is a small AC current metering transformer with standardized 4-20 mADC output. This makes it very useful as an AC current interface to a PLC with 4-20 mADC input.

Used with relays DIB01, PIB01, DIC01, PIC01 or

S 183, one or more setpoints can monitor the current and signal alarm. S 183 also provides the DC voltage supply for the E 82-20.

In the 5 A range the E 82-20 is often used as a 4-20 mADC signal converter for

larger standard AC current transformers with 5 AAC secondary output.

The metered conductor is drawn through the central hole of the current metering transformer. It is possible to measure currents below the nominal range by drawing the conductor through the hole several times. If the conductor is drawn through the central hole e.g. 5 times, the transformer will register 5 AAC when the current in the conductor is 1 AAC.
