

VI TELEFILTER**Filter Specification****TFS 210G****1/5****Measurement condition**

Ambient temperature T_A : 23 °C
 Input power level: 0 dBm
 Terminating impedances at f_C *):
 input: 860 Ω // -6,4 pF
 output: 1,16 k Ω // -6,7 pF

Characteristics

Remark: Reference level for the relative attenuation a_{rel} of the **TFS 210G** is the minimum of the pass band attenuation a_{min} . The minimum of the pass band attenuation a_{min} is defined as the insertion loss a_e . The centre frequency f_C is the arithmetic mean value of the upper and lower frequencies at the 3 dB filter attenuation level relative to the insertion loss a_e . The temperature coefficient of frequency TC_f is valid for both the reference frequency f_C and the frequency response of the filter in the operating temperature range.
