

TS79M00 series

3-Terminal Medium Current Negative Voltage Regulator

TO-220

TO-252

Pin assignment:

1. Ground
2. Input
3. Output

(Heatsink surface connected to Pin 2)

**Voltage Range - 5V to - 24V
Output Current up to 0.5A**

General Description

The TS79M00 Series negative voltage regulators are identical to the popular TS7900 Series devices, except that they are specified for only half the output current. Like the TS7900 devices, the TS79M00 Series 3-Terminal regulators are intended for local, on-card voltage regulation.

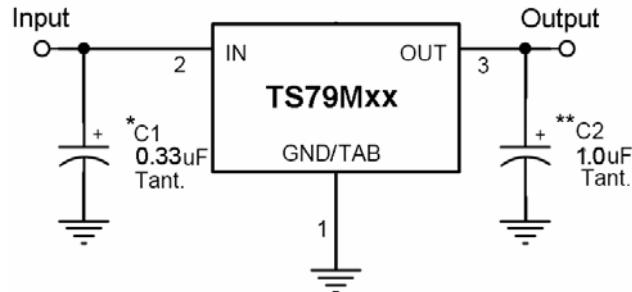

Internal current limiting, thermal shutdown circuitry and safe-area compensation for the internal pass transistor combine to make these devices remarkably rugged under most operating conditions. Maximum output current with adequate heatsink is 500mA

This series is offered in 3-pin TO-220, TO-252 package.

Features

- ✧ Output current up to 0.5A
- ✧ No external components required
- ✧ Internal thermal overload protection
- ✧ Internal short-circuit current limiting
- ✧ Output transistor safe-area compensation
- ✧ Output voltage offered in 4% tolerance

Standard Application

A common ground is required between the input and the output voltages. The input voltage must remain typically 2.0V above the output voltage even during the low point on the Input ripple voltage.

XX = these two digits of the type number indicate voltage.

* = Cin is required if regulator is located an appreciable distance from power supply filter.

** = Co is not needed for stability; however, it does improve transient response.

Ordering Information

Part No.	Operating Temp.	Package
TS79MxxCZ	-20 ~ +125°C	TO-220
TS79MxxCP		TO-252

Note: Where xx denotes voltage option.

Absolute Maximum Rating

Input Voltage	Vin *	- 35	V
Input Voltage	Vin **	- 40	V
Power Dissipation	Without heatsink	2	
	Pt ***	15	W
	Without heatsink	1	
Operating Junction Temperature Range	T _J	-20 ~ +125	°C
Storage Temperature Range	T _{STG}	-65 ~ +150	°C

Note : * TS79M05 to TS79M18
