

Phase Control SCR TO-220AB FULL-PAK, 16 A

TO-220AB FULL-PAK

DESCRIPTION/FEATURES

The 16TTS..FP High Voltage Series of silicon controlled rectifiers are specifically designed for medium power switching and phase control applications. The glass passivation technology used has reliable operation up to 125 °C junction temperature.

Typical applications are in input rectification (soft start) and these products are designed to be used with Vishay HPP input diodes, switches and output rectifiers which are available in identical package outlines.

Fully isolated package ($V_{INS} = 2500 V_{RMS}$) is UL E78996 approved 

This product has been designed and qualified for industrial level.
