◆ OUTLINE

The CM02B series is a M12 sized and sealed circular connector developed for the connection of various sensors equipment.

This series conforms to NECA 4202, official standard of the Japan Electric Control Equipment Industry Association.

The use of the CM02B series will drastically decrease wiring work man-hours needed to connect sensors.

The CM02B series can be used in harsh environmental condition, having IP67 rated for protection against moisture and dust.

This series is also intemateable with our CM01 series.
