### Customer special code

- Notes:** 1) Under the ambience with dangerous gas like H<sub>2</sub>S, SO<sub>2</sub> or NO<sub>2</sub>, wash tight type is recommended; please test the relay in real applications. If the ambience allows, flux proofed is preferentially recommended.  
 2) For the application of lamp (except LED), capacitive load, motor load or which can bring high inrush current when relay contacts connect instantly, AgSnO<sub>2</sub> contact material is recommended on priority.
