## Pulsed Laser Diodes

*OK LJ/LK series*

Wavelength 850 nm

### VERSIONS WITH WINDOW CAP

#### OUTLINE DRAWINGS

#### FEATURES

- \* GaAs/GaAlAs Multiheterostructure chip, MOCVD ( Metal Organic Chemical Vapour Deposition ) semiconductor process.
- \* Up to 100W peak radiant output power from multi-chip stack. (Up to 20Wpk output from a single chip)
- \* Operation over wide temperature range.
- \* Choice of rugged package, both fully hermetic and free of any epoxy.
- \* Package type -24 minimises inductance.
- \* Custom (including fibre pigtail) versions may be considered on request.
- \* Ideally suited for security, weapons simulation and ranging applications under severe environmental conditions.

Dimensions: mm nominal

#### CHARACTERISTICS

Conditions: Case temperature, 25°C.  
Pulse duty cycle, 0.025%.  
Pulse width, 50ns.  
Measurement aperture, f0.75.

| DEVICE TYPE                                      | LJ1 | LJ6 | LJ15 | LJ20 | LK30 | LK50 | LK100 | Units |
|--|-----|-----|------|------|------|------|-------|-------|
| Parameter  |     |     |      |      |      |      |       |       |
| Peak Output Power, $\Phi_T$                      | 1   | 6   | 15   | 20   | 30   | 50   | 100   | W     |
| Maximum Forward Current $I_f$ (for rated output) | 5   | 12  | 25   | 35   | 25   | 35   | 35    | A     |

### ABSOLUTE RATINGS

| DEVICE TYPE                | LJ1 | LJ6 | LJ15 | LJ20 | LK30 | LK50 | LK100 | Unit |
|----------------------------|-----|-----|------|------|------|------|-------|------|
| Peak output power $\Phi_T$ | 3   | 10  | 20   | 25   | 35   | 60   | 110   | W    |
| Forward current $I_f$      | 6   | 15  | 30   | 37   | 30   | 37   | 37    | A    |
| Operating temperature      |     | -45 |      |      | to   |      | +100  | °C   |
| Storage temperature        |     | -45 |      |      | to   |      | +100  | °C   |
| Maximum pulse width        |     |     |      |      | 200  |      |       | ns   |

### TYPICAL PERFORMANCE CHARACTERISTICS

Fig.1 Output v Temperature

Devices are characterised at a pulse width of 50 ns and 0.025% duty cycle. The life expectation of these devices may be significantly reduced at higher peak current, pulse width and duty cycle.

Please consult STC for details of the maximum ratings and for operation at other pulse widths, forward current, duty factor, or output power.

### ORDERING INFORMATION

Order No: LJ [ ] - [ ]  
or: LK [ ] - [ ]

Type: Power :Case Style

Example : LK 50 - 28

Laser diode with 50W peak radiant output power  
from the window of a stud package.

Case negative, type -28 package is standard.

Case positive supplied to special order.(Add suffix P)
