Quad 2-Input Multiplexer

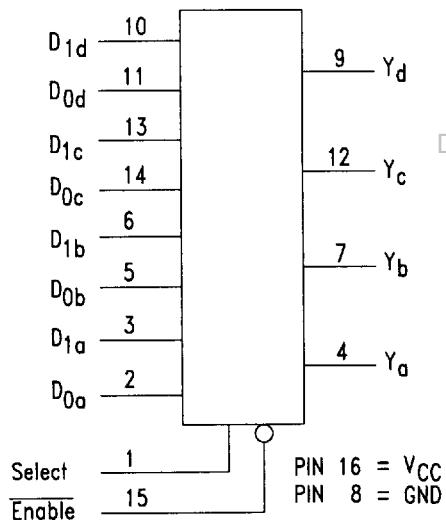

These devices are high speed, quad 2-input multiplexers with common select inputs and enable inputs for each section. It can select 4 bits of data from two sources. In addition to multiplexer operation, it can act as a function generator. The '157 has non-inverted outputs, the '158 has inverted outputs.

- Advanced very high speed CMOS
- Outputs source/sink 24 mA
- Transmission line driving 50 ohms
- ACT has TTL compatible inputs
- Operation from 2 to 6 volts guaranteed
- DC & AC Parameters guaranteed over -40 to +85°C
