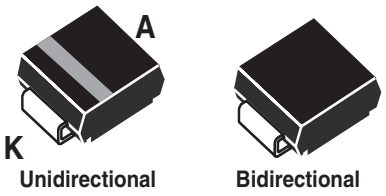
SMA6J

High junction temperature Transil™

Features

- Peak pulse power:
  - 600 W (10/1000 µs)
  - 4 kW (8/20 µs)
- Stand off voltage range: from 5 V to 188 V
- Unidirectional and bidirectional types
- Low clamping voltage versus standard series
- Low leakage current:
  - 0.2 µA at 25° C
  - 1 µA at 85° C
- Operating T_j max: 175° C
- JEDEC registered package outline



SMA
(JEDEC DO-214AC)

Description

The SMA6J Transil series has been designed to protect sensitive equipment against electro-static discharges according to IEC 61000-4-2, MIL STD 883 Method 3015, and electrical over stress such as IEC 61000-4-4 & 5. They are also in accordance with ISO TR 7637-2, SAE J 113 and DIN 40839 for automotive applications and more generally for surges below 600 W 10/1000 µs

This Planar technology makes it compatible with high-end equipment like automotive, medical equipment or SMPS where low leakage current and high junction temperature are required to provide reliability and stability over time. Their low clamping voltages provides a better safety margin to protect sensitive circuits with extended life time expectancy.

Packaged in SMA, this minimizes PCB consumption (SMA footprint in accordance with IPC 7531 standard).

1. Pulse test: t_p <50ms.
2. To calculate maximum clamping voltage at other surge currents, use the following formula

   $V_{CLmax} = R_D \times I_{PP} + V_{BRmax}$
3. To calculate V_{BR} versus junction temperature, use the following formula:

   V_{BR} @ $T_j = V_{BR}$ @ 25 ° C x (1 + αT x (T_j - 25))

3 Package information

- Case: JEDEC DO-214AC molded plastic over Planar junction
- Terminals: Solder plated, solderable per MIL-STD-750, Method 2026
- Polarity: For unidirectional types the band indicates cathode.
- Flammability: Epoxy is rated UL94V-0
- RoHS package

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
