Arbors

All arbors are hardened for maximum strength. Large arbors, for holesaws 32 - 210 mm, have drive pins to transfer large cutting force from the holesaw to the power unit. Pilot drill is included.

The new arbor design from Sandvik, the Power Driver (patent pending) eliminate play. It increases the strength of the holesaw by redistributing the load from the thread to the solid cap. To be used with hand held machines and when operating with high work load in stationary machines.
