Wideband Power Amplifier

RWP15020-10

RFHIC

Product Features

- GaN on SiC Broadband High Power Amplifier
- 1000 to 2000MHz Operation Bandwidth
- Small Signal Gain 29dB min.
- 20W Typical. P3dB

Description

The power amplifier module is designed for Broadcasting, Telecommunication, Medical, Military and Other markets. Operating frequency range is from 1000MHz to 2000MHz

Gallium Nitride on SiC technology is used and attached on an aluminum sub carrier. Full in/out matching for broadband performance is already applied.

Application • UHF/Military

Improved thermal handling by patented technology.

Precautions

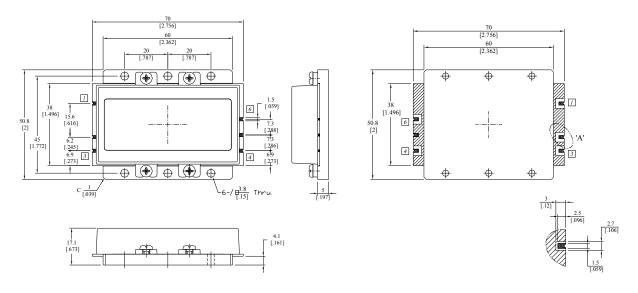

1. This product is designed to be used for broadband amplification.

Heat generation is higher when there is no RF signal in the device. Therefore, the worst case scenario is when there is no RF signal, and the amplifier is "on" with current draw. The temperature must be calculated properly. Case temperature must maintain below 85°C.

Thermal Grease or Metal Thermal Interface Materials are recommended for heat dissipation.
An example would be spreading thermal grease on the bottom of the device.
