

<u>List No.</u>	<u>Description.</u>
	4 Gang Trailing Socket

All body mouldings (including detachable mounting plate) are manufactured in white thermoplastic, with orange release tabs. Main cover secured to base with 4 self tapping screws and secondary cover (housing terminals) secured with 2 self tapping screws. Shutters are manufactured from black thermoplastic. All current carrying parts are manufactured from brass and phosphor bronze. For switched version a switch is located at top left of trailing socket. A neon lamp and resistor assembly is incorporated behind a push fit lens moulding located in cover. Maximum rating 13 Amp total.

Manufactured in accordance with BS1363.

Available in black, white, switched or unswitched and can be supplied with a length of BASEC approved cable and 13 Amp resilient plug to BS1363/A or supplied alone.
