DESCRIPTION

The AWS5502 is a Single Pole Double Throw GaAs MMIC Switch assembled in a SOT-6 plastic package. The AWS5502 is designed for analog and digital application that require low insertion loss, small size, and low cost. State selection is achieved with a complimentary positive voltage (requires positive bias V_s , and blocking caps) or negative voltage (no V_s or blocking caps required).

Typical applications include: selection of synthesizers, filters, amplifiers in dual mode and dual band handsets.
