Terminations, Blind Mate
## dc – 18 GHz

470X Series

V2.00

Features

- OSSP and OS-50P Blind Mate
- Gold Plate Finish Standard
- Bead Chain Available.

Description

Blind Mate OSSP series connection terminations for use in testing modules with the same series connectors. Ideal for bench and field testing of modules using the OSSP series of blind mate connectors or for termination of unused ports. A floating mount version (similar to 4706-7985-02 panel mount connector) is available for press mounting into a mating panel. Consult factory (ref. 4706-6113-00) for more information.
