AN16903A

IC for sound multiplex demodulation in NTSC (Japanese TV mode)

■ Overview

The AN16903A is TV sound multiplex demodulator IC corresponding to both I²C-bus control and parallel control for Japan. The functions of a SIF demodulation, a STEREO demodulation, and a Bilingual demodulation are built in.

■ Features

- Controllable by either I²C bus or parallel.
- Built-in SIF demodulation circuit.
- Perfect adjustment free (in the case of use in SIF input).
In use in base band input, one adjustment is required.
- Reduction of external parts.
- Low power consumption (TYP: $V_{CC} = 5\text{ V}$, $I_{tot} = 22\text{ mA}$)

■ Applications

- TV, VCR, DVD recorder, PC, etc. for Japan.

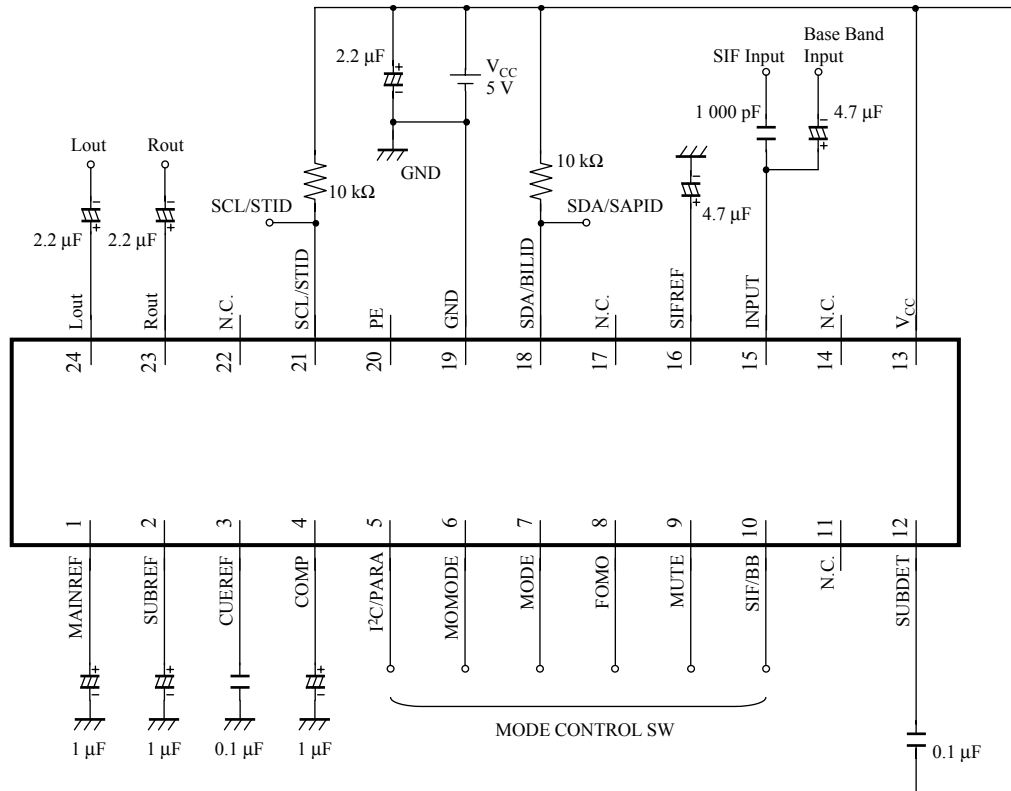

■ Package

- 24 pin Plastic Shrink Small Outline Package (SSOP type)

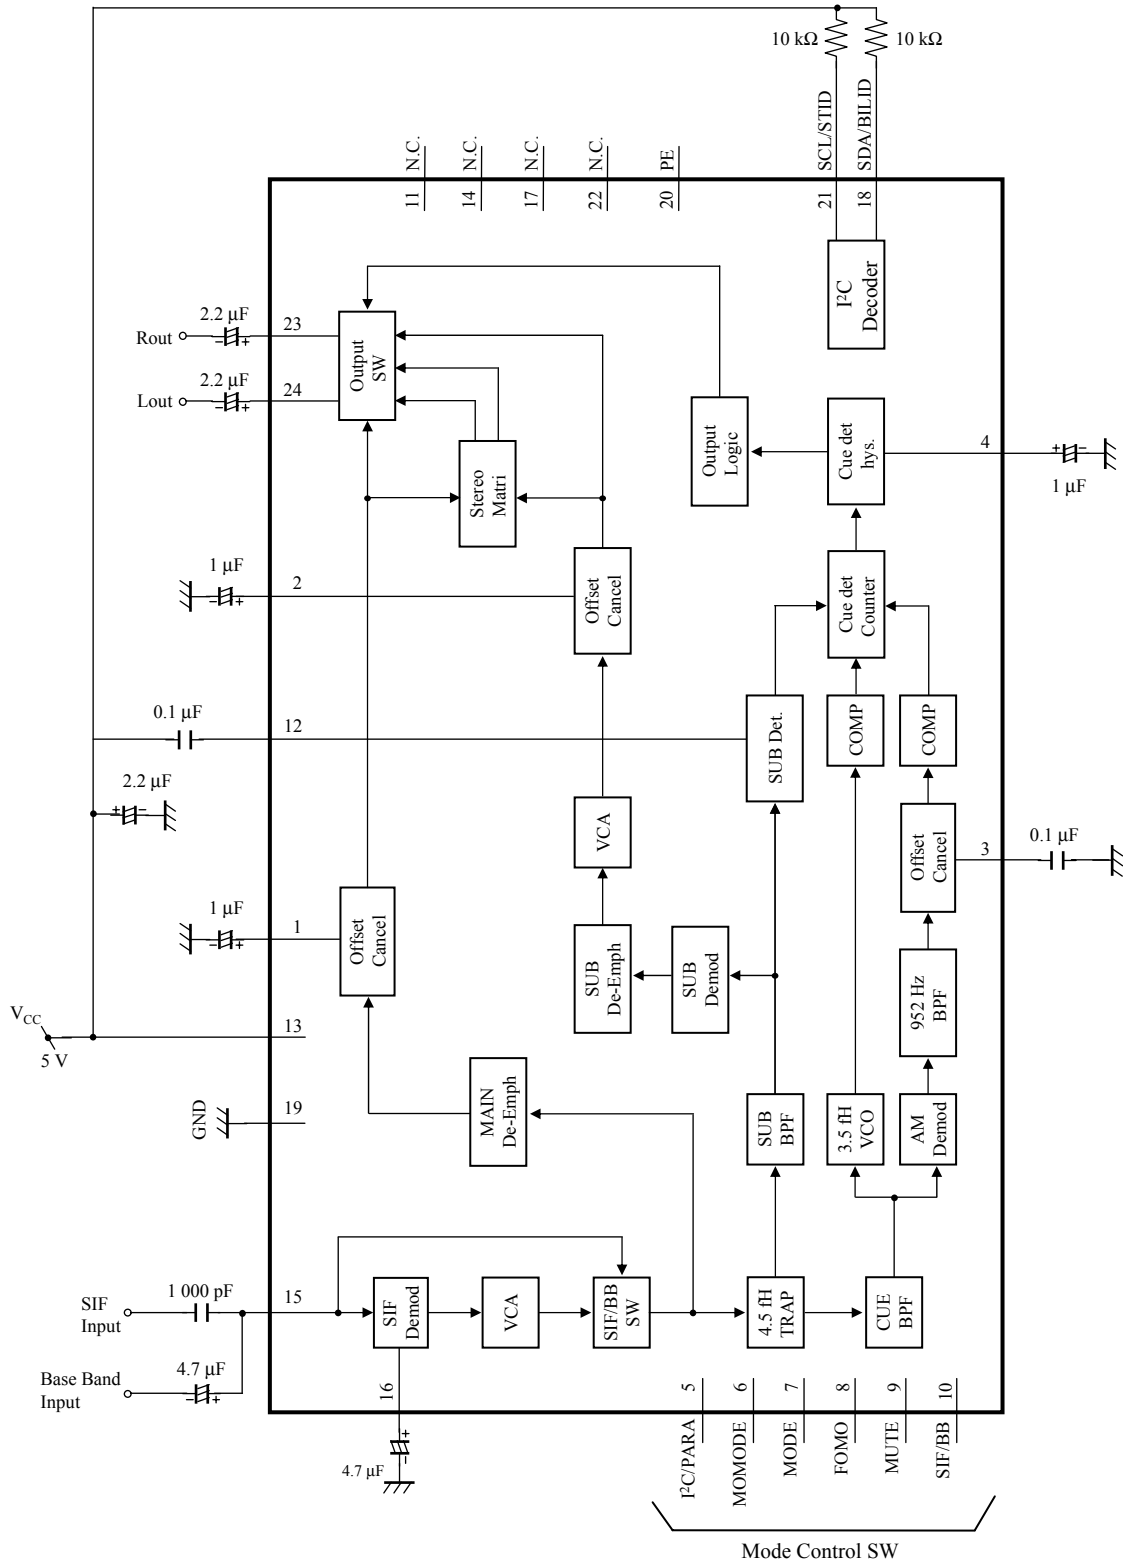

■ Type

- Silicon Monolithic Bipolar IC

■ Application Circuit Example

■ Block Diagram

■ Pin Descriptions

Pin No.	Pin name	Type	Description
1	MAINREF	Input/Output	MAIN system DC offset absorption
2	SUBREF	Input/Output	SUB system DC offset absorption
3	CUEREF	Input/Output	CUE DC offset absorption
4	COMP	Input/Output	COMP
5	I2C/PARA	Input	I ² C/Parallel control selection
6	MOMODE	Input	Forced monaural mode selection (used only for parallel control)
7	MODE	Input	Output mode selection (used only for parallel control)
8	FOMO	Input	Forced monaural selection (used only for parallel control)
9	MUTE	Input	Mute selection (used only for parallel control)
10	SIF/BB	Input	SIF/Base band input selection (used only for parallel control)
11	NC	—	N.C.
12	SUBDET	Input/Output	SUB DET
13	VCC	Power supply	V _{CC}
14	NC	—	N.C.
15	INPUT	Input	SIF/Base band input
16	SIFREF	Input/Output	SIF REF
17	NC	—	N.C.
18	SDA/BILID	Input/Output	SDA / BILINGUAL ID
19	GND	Ground	GND
20	PE	—	PE
21	SCL/STID	Input/Output	SCL / STEREO ID
22	NC	—	N.C.
23	ROUT	Output	R-ch output
24	LOUT	Output	L-ch output

■ Absolute Maximum Ratings

A No.	Parameter	Symbol	Rating	Unit	Notes
1	Supply voltage	V_{CC}	6.0	V	*1
2	Supply current	I_{CC}	32	mA	—
3	Power dissipation	P_D	156	mW	*2
4	Operating ambient temperature	T_{opr}	–20 to 85	°C	*3
5	Storage temperature	T_{stg}	–55 to 125	°C	*3

Notes) *1: The values under the condition not exceeding the above absolute maximum ratings and the power dissipation.

*2: The power dissipation shown is the value at $T_a = 85^\circ\text{C}$ for the independent (unmounted) IC package.

*3: Except for the operating ambient temperature and storage temperature, all ratings are for $T_a = 25^\circ\text{C}$.

■ Operating Supply Voltage Range

Parameter	Symbol	Range	Unit	Notes
Supply voltage range	V_{CC}	4.5 to 5.5	V	*

Note) *: The values under the condition not exceeding the above absolute maximum ratings and the power dissipation.

■ Allowed Voltage Ranges

Pin No.	Pin name	Rating	Unit	Notes
5	I2C/PARA	–0.3 to ($V_{CC} + 0.3$)	V	*1
6	MOMODE	–0.3 to ($V_{CC} + 0.3$)	V	*1
7	MODE	–0.3 to ($V_{CC} + 0.3$)	V	*1
8	FOMO	–0.3 to ($V_{CC} + 0.3$)	V	*1
9	MUTE	–0.3 to ($V_{CC} + 0.3$)	V	*1

Pin No.	Pin name	Rating	Unit	Notes
10	SIF/BB	–0.3 to ($V_{CC} + 0.3$)	V	*1
13	VCC	–0.3 to 6.0	V	—
18	SDA/BILDT	–0.3 to ($V_{CC} + 0.3$)	V	*1
21	SCL/STID	–0.3 to ($V_{CC} + 0.3$)	V	*1

Notes) 1. Volotage values, unless otherwise specified, are with respect to GND.

2. Do not apply external current or volotage to any pin not mentioned below.

3. *1: ($V_{CC} + 0.3$) V should not be more than 6.0V.

Request for your special attention and precautions in using the technical information and semiconductors described in this book

- (1) If any of the products or technical information described in this book is to be exported or provided to non-residents, the laws and regulations of the exporting country, especially, those with regard to security export control, must be observed.
- (2) The technical information described in this book is intended only to show the main characteristics and application circuit examples of the products, and no license is granted under any intellectual property right or other right owned by our company or any other company. Therefore, no responsibility is assumed by our company as to the infringement upon any such right owned by any other company which may arise as a result of the use of technical information described in this book.
- (3) The products described in this book are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
 - Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
 - Any applications other than the standard applications intended.
- (4) The products and product specifications described in this book are subject to change without notice for modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.
- (5) When designing your equipment, comply with the range of absolute maximum rating and the guaranteed operating conditions (operating power supply voltage and operating environment etc.). Especially, please be careful not to exceed the range of absolute maximum rating on the transient state, such as power-on, power-off and mode-switching. Otherwise, we will not be liable for any defect which may arise later in your equipment.
 - Even when the products are used within the guaranteed values, take into the consideration of incidence of break down and failure mode, possible to occur to semiconductor products. Measures on the systems such as redundant design, arresting the spread of fire or preventing glitch are recommended in order to prevent physical injury, fire, social damages, for example, by using the products.
- (6) Comply with the instructions for use in order to prevent breakdown and characteristics change due to external factors (ESD, EOS, thermal stress and mechanical stress) at the time of handling, mounting or at customer's process. When using products for which damp-proof packing is required, satisfy the conditions, such as shelf life and the elapsed time since first opening the packages.
- (7) This book may be not reprinted or reproduced whether wholly or partially, without the prior written permission of Matsushita Electric Industrial Co., Ltd.
