# 16×32 dot matrix unit

The LUM-512HMU307 is a 16×32 dot matrix display which can be used in a wide range of applications, including alphabet, numeric, symbol and graphical displays. A large display can be easily created by arranging a number of these dot matrix displays in an array, and they can be applied to a variety of display purposes. A custom LSI controller has display data memory for two screens, and data for each screen can be written and displayed in turn.

# Applications

Light source for displays

## ● Features

1) 16×32 dot matrix.

Shape of emitting section :  $\square 2.0 \times 2.5$ 

- 2) Dimensions: 64mm×128mm
- 3) Achieved high brightness by using chip LEDs with inner lens.
- 4) Three-color display is possible (red, green, and orange).
- 5) 1 / 16 duty dynamic scan method.
- Ultra-thin shape of 13.3mm, light weight of 95g and wide directional characteristics of 100 degrees.

# ●External dimensions (Units : mm)
