

Network Processor with Integrated Ethernet Switch

CX84200

Single-Chip Solution with Integrated Five-Port Ethernet Switch

Conexant's broadband communications portfolio includes a comprehensive suite of semiconductor solutions that enable the digital home and information network. The Conexant CX84200 Network Processor supports complete networking system solutions for a wide variety of mainstream applications in the residential and SOHO environments. Based on a 75 MHz ARM7TDMI, this Network Processor is a single-chip solution with an integrated switch that supports five 10/100 Mbps Ethernet ports.

In a Broadband Gateway application, the CX84200 Network Processor can provide Internet access sharing capability for multiple PCs, while supporting Ethernet, HomePNA (Phoneline), HomePlug (Powerline), IEEE 802.11 and other LAN-side networking platforms. For WAN access, the unit supports Ethernet connectivity interoperable with any broadband modem. It is the ideal platform for a configurable broadband gateway design that needs to accommodate many diverse WAN/LAN topologies.

The device complies with IEEE 802.3 specification and includes five embedded DSP-based 10Base-T/100Base-TX transceivers. An auto negotiation function determines the selection of either the 10Base-T or 100Base-TX mode. Typical applications would be a Wireless Home Gateway including an Ethernet WAN port to connect to a Broadband modem, four Ethernet LAN ports, and an 802.11b access connecting to any Wi-Fi compatible device.

Wireless Home Gateway

CX84200 Distinguishing Features

- Single-chip, high-performance processor with five-port integrated Ethernet switch
- Can be easily integrated with various IEEE 802.11b solutions
- Supports HomePlug (Powerline) and HomePNA (Phoneline) through an MII interface

Part Number CX84200

Description Network Processor with Integrated Ethernet Switch

CX84200 Home Network Processor block diagram

CX84200 Features

- 5 Ethernet ports, 1 MII
- Embedded RISC CPU, 75MHZ ARM7TDMI
- Embedded switch engine
 - Store-and-forward operation
 - Non-blocking, full line speed capability
 - Full-duplex (IEEE802.3x) and half-duplex flow control (Back pressure)
 - Two priorities CoS, set by port, VLAN tag, TCPIPTOS, and customized type
 - 6 port grouping VLAN (overlappable)
 - MIB counters
 - Sharing dynamic data buffer management, embedded SSRAM
 - MAC look-up table read/write-able
 - MAC address level security
 - Bandwidth control
 - Hashing scheme: direct-map or XOR

- Embedded 10/100BaseT/TX PHY
 - DSP based design
- 10BASE-T/100BASE-TX IEEE 802.3u Compliant
- Digital Decision Feedback Equalizer
- Integrated Baseline Wander Correction
- 3 LEDs provided per port
- Flash interface (512Kx8, 512Kx16 up to 1Mx16)
- SDRAM interface (1Mx16x2 up to 4Mx16x2)
- 2 UART interface, one for the modem interface
- GPIO pins
- LAN / WAN bandwidth prioritized
- Single 25MHz crystal input for network
- 2.5/3.3V, 0.25u CMOS process, 208-pin PQFP
