DM74ALS880A Dual 4-Bit D-Type Transparent Latch with TRI-STATE® Outputs

General Description

These dual 4-bit registers feature totem-pole TRI-STATE outputs designed specifically for driving highly-capacitive or relatively low-impedance loads. The high-impedance state and increased high-logic-level drive provide these registers with the capability of being connected directly to and driving the bus lines in a bus-organized system without need for interface or pull-up components. They are particularly attractive for implementing buffer registers, I/O ports, bidirectional bus drivers, and working registers.

The eight inverting latches of the ALS880A are transparent D-type latches. While the enable (G) is high the \bar{Q} outputs will follow the complement of the data (D) inputs. When the enable is taken low the output will be latched at the complement of the level of the data that was set up.

A buffered output control input can be used to place the eight outputs in either a normal logic state (high or low logic

levels) or a high-impedance state. In the high-impedance state the outputs neither load nor drive the bus lines significantly.

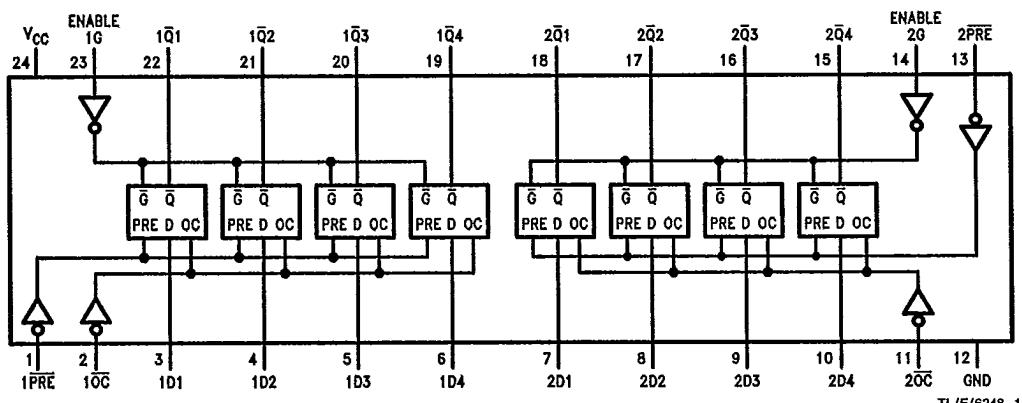

The output control does not affect the internal operation of the latches. That is, the old data can be retained or new data can be entered even while the outputs are off.

Features

- Switching specifications at 50 pF
- Switching specifications guaranteed over full temperature and V_{CC} range
- Advanced oxide-isolated, ion-implanted Schottky TTL process
- TRI-STATE buffer-type outputs drive bus lines directly
- Space saving 300 mil wide package

Absolute Maximum Ratings

Supply Voltage	7V	Note: The "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the "Electrical Characteristics" table are not guaranteed at the absolute maximum ratings. The "Recommended Operating Conditions" table will define the conditions for actual device operation.
Input Voltage	7V	
Voltage Applied to Disabled Output	5.5V	
Operating Free Air Temperature Range DM74ALS	0°C to +70°C	
Storage Temperature Range	-65°C to +150°C	
Typical θ_{JA}		
N Package	51.0°C/W	
M Package	86.5°C/W
