

## key features

- 20W 1.6 x 2 standard package
- 100°C case operation
- 3.3V output available
- integrated heatsink
- enable and trim pins
- wide range input voltage
- 1500 VDC isolation
- short circuit protection

The MWS series of DC to DC converters provides up to 20W of output power in the industry standard 1.6" x 2" package and footprint. The MWS is available in 24V and 48V input versions. With a maximum case temperature of 100°C, the MWS is well suited for the most demanding telecom, networking, and industrial applications. The MWS features 1500VDC of isolation, shortcircuit, and overtemperature protection.

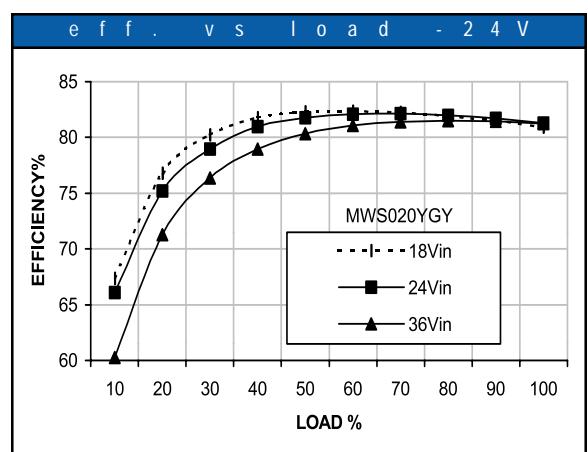

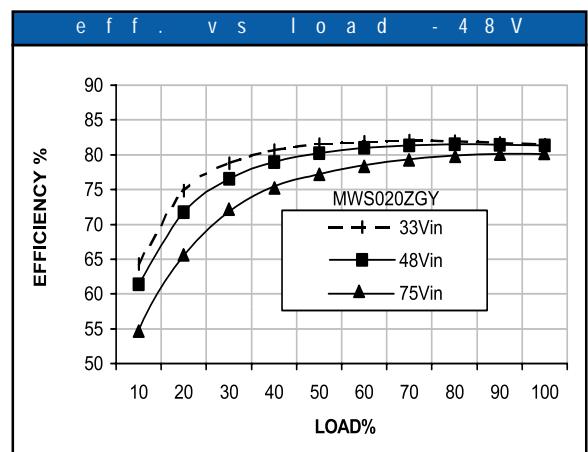

The MWS is 100% surface mount construction and is built in IPD's fully automated ISO 9001 factory located in Boston.
