

# Linear Power Amplifiers

## CPA Series

### Features

- Amplifier packages available in the ADC, GSM and both PDC/JDC bands.
- Linearity can be further enhanced for custom applications.
- Single Channel and Multi-Carrier
- Custom packaging available.

### Description

M/A-COM's single channel and multi-carrier Linear Power Amplifiers meet the demanding needs of higher capacity Digital Cellular and PCN systems. Enhanced linearity required to meet strict FCC mask requirements can be accomplished through the use of Feed Forward techniques.

Put M/A-COM on your team today to develop Power Amplifiers optimized to meet your exact needs. As a first step, these standard design amplifiers are available for evaluation in your facility.

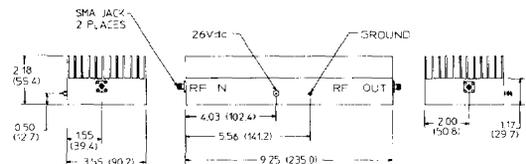

| Model Number | Frequency     | Output Power (Average) | Gain       | Operating Mode | Linearity            | Supply Voltage (Vs) |
|--------------|---------------|------------------------|------------|----------------|----------------------|---------------------|
| CPA-112-CBA  | 869-894 MHz   | 43.0 dBm min           | 18 dB min  | Class AB       | IM3, -28 dBc max     | 24-26 volts         |
| CPA-120-CBA  | 869-894 MHz   | 47.0 dBm min           | 24 dB min  | Class AB       | IM3, -28 dBc max     | 24-26 volts         |
| CPA-113-CBA  | 925-960 MHz   | 43.0 dBm min           | 18 dB min  | Class AB       | IM3, -28 dBc max     | 24-26 volts         |
| CPA-110-PBM  | 1805-1880 MHz | 45.0 dBm min           | 7.5 dB min | Class AB       | AM/PM max 1.0 deg/dB | 24-25 volts         |
| CPA-111-PBA  | 1805-1880 MHz | 38.5 dBm min           | 29 dB min  | Class AB       | IM3, -25 dBc max     | 24-25 volts         |
| CPA-114-PBA  | 1805-1880 MHz | 43.0 dBm min           | 24 dB min  | Class AB       | IM3, -25 dBc max     | 23-24 volts         |
| CPA-118-PAA  | 1750-3000 MHz | 29.0 dBm min           | 23 dB min  | Class A        | AM/PM max 1.0 deg/dB | 7-10 volts          |

### 869-894 MHz, P<sub>out</sub> > 43 dBm Average

#### Specifications

| Parameter      |               |
|----------------|---------------|
| Frequency      | 869-894 MHz   |
| Supply Voltage | 24-26 volts   |
| Supply Current | 4 amperes max |
| Temperature    | 0° to +60°C   |

#### CPA-112-CBA

#### Electrical Characteristics

| Parameter           | Conditions  |                      |
|---------------------|---|----------------------|
| Linear Output Power | V <sub>s</sub> = 26 V                                     | 43 dBm min           |
| Gain                | V <sub>s</sub> = 26 V                                     | 18 dB min            |
| Gain Flatness       | F = 869-894 MHz   | 1 dB max             |
| In/Out VSWR         |   | 1.5:1 max            |
| Efficiency          | P <sub>out</sub> > 43 dBm average                         | 25% min <sup>1</sup> |
| Harmonics           |   | -35 dBc max          |
| Phase Linearity     | P <sub>out</sub> = 1 to 43 dBm                            | 1.5°/dB              |
| Intermodulation     | P <sub>out</sub> = 43 dBm average, Tone spacing = 100 KHz | -28 dBc max          |

| Output power detector         |   | 0.35 V/dBm max                          |
| Reverse output power detector |   | 0.065 V/dBm max                         |
| Phase Linearity               | P <sub>out</sub> < 45 dBm   | 1.0 °/dB max                            |
| Reverse Intermodulation       | P <sub>out</sub> = 43 dBm cw, -13 dBm tone, 200 KHz offset, injected back into output | -70 dBc max<br>-36 dBm max <sup>2</sup> |

NOTES:

- 1) Operating mode Class AB
- 2) Output, whichever is higher

CPA-110-PBM

1805-1880 MHz, P<sub>out</sub> > 36 dBm Average

Specifications

| Parameter      |               |
|----------------|---------------|
| Frequency      | 1805-1880 MHz |
| Supply Voltage | 24-25 volts   |
| Supply Current | 2 amperes max |
| Temperature    | 0° to +60°C   |

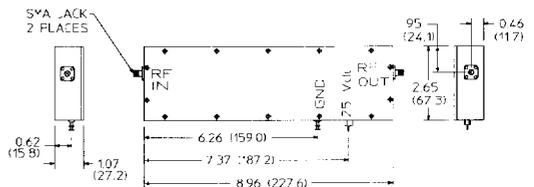

Electrical Characteristics

| Parameter           | Conditions  |                      |
|---------------------|---|----------------------|
| Linear Output Power | V <sub>s</sub> = 24 V                                     | 38.5 dBm min         |
| Gain                | P <sub>out</sub> = +1 to +38 dBm                          | 29 dB min            |
| Gain Flatness       | P <sub>out</sub> = +1 to +38 dBm                          | 1 dB max             |
| In/Out VSWR         |   | 1.5:1 max            |
| Efficiency          | P <sub>out</sub> > 36 dBm average                         | 15% min <sup>1</sup> |
| Harmonics           |   | -60 dBc max          |
| Phase Linearity     | P <sub>out</sub> = 1 to 39 dBm                            | 1.0 °/dB max         |
| Intermodulation     | P <sub>out</sub> = 36 dBm average, Tone spacing = 200 KHz | -25 dBc max          |

NOTES:

- 1) Operating mode Class AB

CPA-111-PBA

Specifications Subject to Change Without Notice.

1805-1880 MHz, P<sub>out</sub> > 40 dBm Average

Specifications

| Parameter      |               |
|----------------|---------------|
| Frequency      | 1805-1880 MHz |
| Supply Voltage | 23-24 volts   |
| Supply Current | 3 amperes max |
| Temperature    | 0° to + 60°C  |

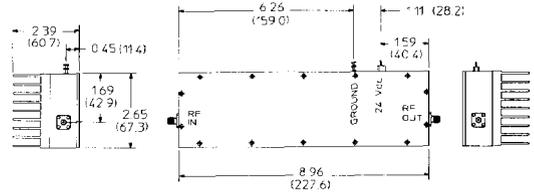

Electrical Characteristics

| Parameter           | Conditions   |                      |
|---------------------|--|----------------------|
| Linear Output Power | V <sub>s</sub> = 24 V  | 43 dBm min           |
| Gain                | V <sub>s</sub> = 26 V  | 18 dB min            |
| Gain Flatness       | F = 1805-1880 MHz  | 1 dB max             |
| In/Out VSWR         |  | 1.5:1 max            |
| Efficiency          | P <sub>out</sub> > 40 dBm average                            | 25% min <sup>1</sup> |
| Harmonics           |  | -35 dBc max          |
| Phase Linearity     | P <sub>out</sub> = 1 to 40 dBm                               | 1.5 °/dB max         |
| Intermodulation     | P <sub>out</sub> = 40 dBm average,<br>Tone spacing = 100 KHz | -25 dBc max          |

NOTES:

- 1) Operating mode Class AB

CPA-114-PBA

1750-3000 MHz, P<sub>out</sub> > 30 dBm Average

Specifications

| Parameter                 |                                       |
|---------------------------|---------------------------------------|
| Frequency                 | 1750-3000 MHz                         |
| Drain Voltage             | 7-10 volts                            |
| Gate Voltage <sup>2</sup> | -10.5 min/-9.5 max volts <sup>2</sup> |
| Drain Current             | 0.8 amperes max                       |
| Gate Current              | 40 mA max                             |
| Temperature               | -10° to + 60°C                        |

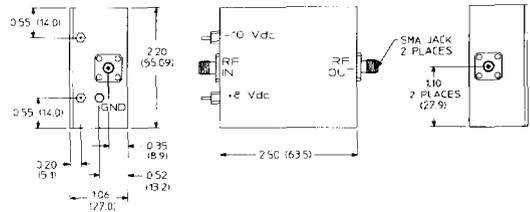

Electrical Characteristics

| Parameter           | Conditions                                    |                          |
|---------------------|---|--------------------------|
| Linear Output Power | V <sub>dd</sub> = 9 V, V <sub>gg</sub> = -10V | 29 dBm min               |
| Gain                | P <sub>out</sub> = 30 dBm                     | 23 dB min <sup>3,4</sup> |
| Gain Flatness       | P <sub>out</sub> = 30 dBm                     | 1 dB max                 |
| Input VSWR          |   | 1.3:1 max                |
| Output VSWR         |   | 2:1 max                  |
| Phase Linearity     | P <sub>out</sub> < 30 dBm                     | 1.0 °/dB max             |

NOTES:

- 1) Operating mode Class A
- 2) Gain varies by 0.04 dB/°C (decreases for increasing temperature)
- 3) Gain set by resistive input attenuator network. Up to 35 dB gain is available by changing component values
- 4) Units are supplied with voltage sequencer.
- 5) Units with up to +33 dBm output power are available on special order.
