

DC to DC Converters

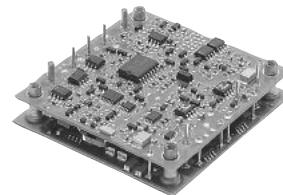

Distributed Power Supplies for Systems, Insulation Type

Half Brick Type iHA/iHD Series

Power supply systems for infrastructure devices used in communication networks primarily use brick-type DC to DC converters.

As the voltage used for LSIs continues to drop, power supplies are expected to provide lower output, higher efficiencies, and lower noise levels. Moreover, the high-power is needed in the mid output voltage such as RF lamps.

To meet these demands, we have developed half brick types with low output voltage.

FEATURES

- Wide input voltage range (DC.36 to 75V)
- There are 19 models in the lineup of products with low to medium output voltages.
- High efficiency: 92%(5V and 28V output)
- Heat sink is not required.
- Remote ON-OFF function
- Output voltage external variable function
- Remote sensing function
- Various protective functions
- Parallel operations are available only for iHD type

PRODUCT IDENTIFICATION

iHA	48	060A	012V	-○○○
(1)	(2)	(3)	(4)	(5)

(1) Type name

iHA/iHD: Half brick type

(2) Rated input voltage

(3) Output current

(4) Output voltage

(5) Option code

001: Standard(Negative on/off logic, Pin length: 3.68mm,
Shutdown type OVP)

000: Positive on/off logic, Pin length: 3.68mm,
Shutdown type OVP

002: Positive on/off logic, Pin length: 3.68mm,
Automatic recovery type OVP

003: Negative on/off logic, Pin length: 3.68mm,
Automatic recovery type OVP

004: Positive on/off logic, Pin length: 2.79mm,
Shutdown type OVP

005: Negative on/off logic, Pin length: 2.79mm,
Shutdown type OVP

006: Positive on/off logic, Pin length: 2.79mm,
Automatic recovery type OVP

007: Negative on/off logic, Pin length: 2.79mm,
Automatic recovery type OVP

PART NUMBERS AND RATINGS

Output voltage(V)	Current(A)	Part No.
Low output voltage type		
1.2	60	iHA48060A012V
1.5	60	iHA48060A015V
1.8	60	iHA48060A018V
2.5	60	iHA48060A025V
3.3	40	iHA48040A033V
3.3	60	iHA48060A033V
5	40	iHA48040A050V

Oscillating frequency	kHz	300typ.[1.2V and 1.5V output: 240kHz]													

*1 Verify the rated current (maximum output current) because this involves derating.

*2 Applies only to the primary surge. The power supply does not have an input fuse, so make sure to install an external fuse when using this product.

*3 Load step from 50 to 75% of Io max.
