

Description:

Stealth Microwave's **SL Series** bench-top lab units can accommodate any Stealth Microwave SSPA module. The unit features a built in AC supply, control circuitry, and forced air cooling, all contained in a rugged housing to allow for ease of operation. A smaller form factor is available for modules with power outputs of up to 5W.

Features

- +110/220 VAC supply
- Thermal Protection with Auto Reset
- VSWR Protection
- Internal forced air cooling

Options

- LCD output power display to monitor CW output levels in dBm and Watts

**DIMENSIONS IN INCHES**
