

Small Integrated Transmitter Unit

SITU2011

0.05 – 3 GHz, 1310 nm Directly Modulated Self-Contained Transmitter

Applications

- Cellular and PCS Antenna-Remoting
- Microwave Delay-Lines
- Frequency distribution system
- Radar System Calibration
- Phased Array Antenna Systems

Features

- High-power 1310 nm DFB laser and bias-control circuitry
- 8 dBm Optical Output Power

The Emcore Small Integrated Transmitter Unit (SITU2011) is a high-performance, directly modulated transmitter for applications with guaranteed performance over the 50 MHz to 3 GHz frequency band. The SITU2011 is a fully integrated unit that contains both the optics and the control electronics. Only DC input voltages and the RF input signal are required for operation.

The unit can be used to construct transparent optical links for antenna remoting, microwave delay lines and other applications where it is necessary to transport RF over long distances without signal degradation.

The unit operates at a nominal optical wavelength of 1310 nm.
