Aluminium Housed Wirewound Resistors

WH Series

- **High power dissipation up to 300W**
- **All welded construction**
- **Suitable for severe environments**
- **Designed for excellent thermal conductivity to heatsink**
- **Spade terminal option**
- **RoHS compliant**

Construction

Cap and lead assemblies are fitted to a high purity ceramic substrate. The resistive element is wound onto the substrate and welded to the caps. The wound rod is then moulded and fitted into aluminium housing to give optimum stability and reliability.

Marking

The resistors are legend marked with type reference, resistance value and tolerance which will withstand all accepted industrial cleaning fluids. Values are marked in accordance with IEC 62

Terminations

WH5-100

Material Pb-free solder dipped, copper clad steel

Strength The terminations meet the requirements of IEC 68.2.21

Solderability The terminations meet the requirements of IEC 115-1, clause 4.17.3.2

WH25T & 50T 6.35mm (¼") spade terminal

WH200 & 300

Material M6 threaded steel terminal with a set of four nuts and washers

Strength Termination robustness 50N max
Tightening torque 5Nm max

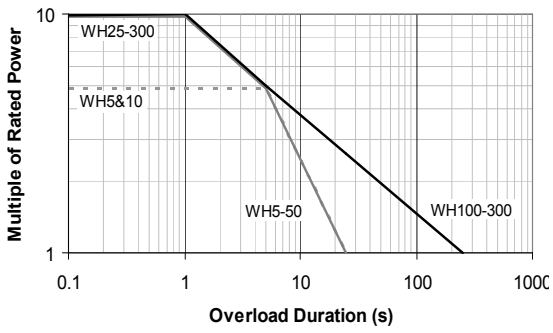
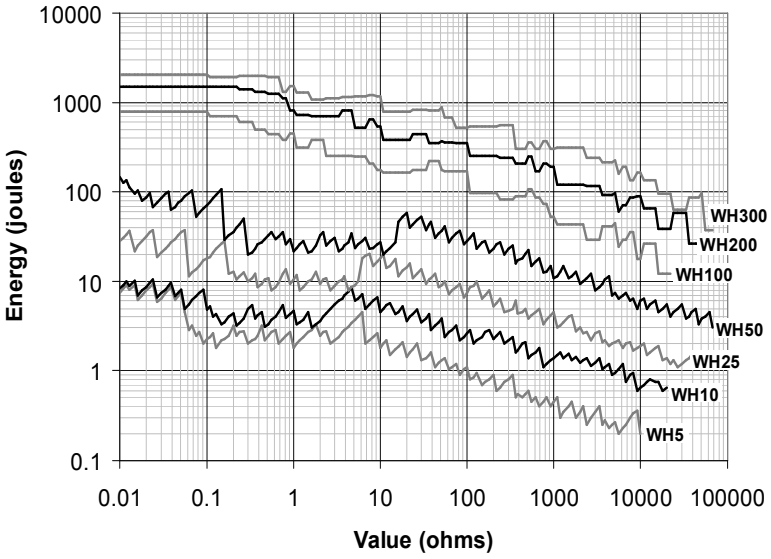
Pulse and Overload Performance

For short durations of ≤0.1s the energy graph should be used. For longer durations the overload graph applies.





Application Notes

After soldering, care should be taken to ensure that there are no flux residues on the end faces of the moulding compound, otherwise insulation resistance will be reduced. The minimum surface tracking distances from termination to casing are shown in the Physical Data tables as dimension Dt.

It is recommended that the resistor base should be coated thinly with heatsink compound before mounting to obtain the stated operating characteristics. The heatsink compound increases thermal conductivity to the heatsink.

The standard aluminium heatsinks are defined in the table below. If smaller heatsinks are used then derating should be applied as indicated in the graph below. If no heatsink is employed, use the ratings for 1cm^2.

Packaging

WH5, 10, 25, 50 &100 resistors are packed in plastic bags and boxed. WH200 & 300 are individually boxed.

Ordering Procedure

Example: WH25 with spade terminals at 100 ohms with a 5% tolerance:

W H 2 5 T – 1 0 0 R J I

Type

Termination

	Standard
T	Spade terminal

Value (use IEC62 code)

Tolerance (use IEC62 code)

F	1%	J	5%
G	2%	K	10%

Packing

I	WH5, 10, 25, 50	Bulk	10/box	Standard
	WH100, 200, 300		1/box	

The following options apply to WH5, 10, 25 & 50 only:
For CECC released product state on order the CECC number and style. Example: **WH25-3K3JI CECC40203-006 CA**
For SnPb finish instead of Pb-free replace the packing suffix with **PB**. Example: **WH25-3K3JPB**
