

The D series is capable of withstanding voltages up to 15kV, the D series high voltage reed relay is suitable for high reliability applications such as cardiac defibrillators, test equipment and high voltage power supplies. Two contact materials are available for low contact resistance or power switching applications. Standard coil voltages of 5, 12 and 24 volts are available with form A and B contact configurations.

Printed Circuit Board (PCB) mount and panel mount (nylon studs) configurations available. Optional electrical connections include solder turret tag, flying lead and Faston* style spade terminals.

- **15kV Isolation**
- **Low Contact Resistance**
- **High Power Switching**
- **PCB or Panel Mount**
- **Flying Lead, Solder Turret and Faston* style spade terminals Options**

Part Numbering System

Mounting Style:

No suffix: Standard PCB mount

F: Flying Lead Contact Terminals

S: Panel Mount via nylon studs, Faston* style spade terminals

P: Panel Mount via nylon studs, turret contact/coil terminals

Mechanical Dimensions

All dimensions are in millimetres (inches)

STANDARD
