

708 Series Keyed Biconic Fiber Optic Connectors & Assemblies

The Methode keyed biconic single mode connector enhances time-proven biconic technology and is compatible with AT&T's Keyed Biconic Interconnect System. Methode offers keyed biconic cable assemblies built to customer specifications. All cable assemblies are optically tested for insertion loss and return loss performance. Please contact the factory or your Methode representative for more information.

Features

- Keyed design improves repeatability
- Superior optical performance:
 - Low insertion loss
 - Low return loss
- Compatible with standard single mode biconic products
- Terminates with standard biconic termination tools and consumables

Specifications

Insertion Loss: <0.35 dB (typical)

Return Loss: <-42 dB (typical)

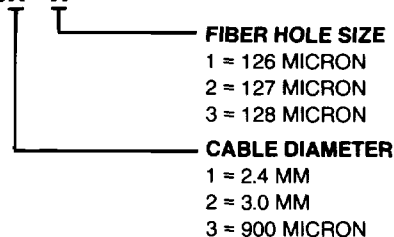

Material: Plug - Reinforced thermoset plastic
Cap - Polyether sulfone

Color: Green

Operating Temperature: -40° C to +80° C
