

3W,wide input isolated & regulated
DC-DC converter

Patent Protection  

FEATURES

- Wide range of input voltage (2:1)
- DIP package
- Efficiency up to 86%
- 3KVDC isolation
- Short circuit protection(automatic recovery)
- Operating temperature range:-40°C ~ +85°C
- Meet EN60950

The WRE_P-3WR2 & WRF_P-3WR2 Series are specially designed for applications where a wide range input voltage power supplies are isolated from the input power supply in a distributed power supply system on a circuit board. For these DC-DC converters, you can reduce the failure points of design, and save the manpower, material and time cost in developing micro power supply, and also ensure better quality, stability, safety protection, and reliability for the end products.

These products apply to where:

- 1) Where the voltage variation range of the input power supply $\leq 2:1$;
- 2) Where isolation is necessary between input and output (isolation voltage $\leq 3KVDC$);
- 3) Where high requirements for the output voltage stability and output ripple noise are applied;
In circuits such as industrial control, electric power, communication system power supply, etc.

Design Reference

1. Output load requirements

To ensure that the module can work efficiently and reliably, its output min. load shall be no lower than 5% of the rated load when using, or the output ripple may increase rapidly. Ensure that the product working load must be higher than 5% of the rated load.

2. Typical application

All the DC/DC converters of this series are tested according to the recommended circuit (see Fig. 2) before delivery.

If it is required to further reduce input and output ripple, properly increase the input & output of additional capacitors C_{in} and C_{out} or select capacitors of low equivalent impedance provided that the capacitance is no larger than the max. capacitive load of the product.

V_{in}	5V&12V	24V&48V
C_{in}	100 μ F	10 μ F~47 μ F
C_{out}	10 μ F

C2	4.7 μ F/50V			4.7 μ F /100V
C3	10 μ F			
CY1	1nF/3KV			

Note: ①.Part ① in the Fig. 3 is used for EMS test and part ② for EMI filtering; selected based on needs.
 ②.If there is no recommended parameters, the model no require the external component.

EMC solution-recommended circuit PCB layout

Fig. 4

Note: Note: the min. distance of the bonding pads between input grounding and output grounding shall be ≥ 2 mm.

4. Input current

When the electricity is provided by the unstable power supply, please make sure that the range of the output voltage fluctuation and the ripple voltage of the power supply do not exceed the indicators of the modules. Input current of power supply should afford the flash startup current of this kind of DC/DC module(see Fig. 5).

Generally: Vin=5V Iave =1400mA
 Vin=12V Iave=620mA
 Vin=24V Iave=310mA
 Vin=48V Iave =150mA

Dimensions and Recommended Layout

- Note:
1. Packing Information please refer to 'Product Packing Information'. Packing bag number: 58210008;
 2. The min. load shall be no lower than 5%, or the output ripple may increase rapidly; If the product is operated under the min. required load, the product performance cannot be guaranteed to comply with all performance indexes in the Manual, but the reliability of the product will not be influenced;
 3. The unbalance degree of the recommended dual output module load: $\leq 5\%$; If the degree exceeds $\pm 5\%$, then the product performances cannot be guaranteed to comply with all the performance indicators in the manual, and please directly contact our technicians for specific information;
 4. The max. capacitive load should be tested within the input voltage range and under full load conditions;
 5. Unless otherwise specified, data in this datasheet should be tested under the conditions of $T_a=25^\circ\text{C}$, humidity<75% when inputting nominal voltage and outputting rated load;
 6. All index testing methods in this datasheet are based on our Company's corporate standards;
 7. The performance indexes of the product models listed in this datasheet are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technicians for specific information;
 8. We can provide product customization service;
 9. Specifications of this product are subject to changes without prior notice.
