

# Integrated Wireless LAN Modules with Integrated TCP/IP Stack

## BP3580 / BP3591

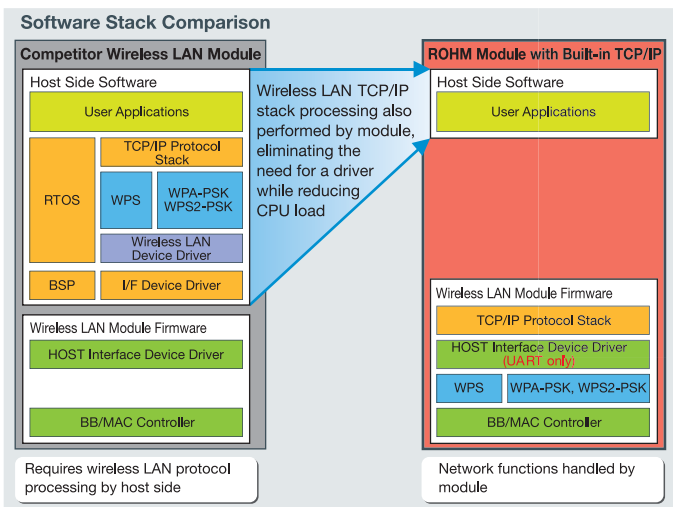

## Integrated TCP/IP stack eliminates the need for device driver development

ROHM's BP3580 and BP3591 IEEE802.11b/g/n wireless LAN modules perform all LAN protocol processing, including WPS/WPA-PSK, and WPA2-PSK, significantly lightening host load. In addition, the units integrate a TCP/IP protocol stack\* that eliminates the need for device driver development and enables wireless LAN functionality simply by adding application software.

\*Modules with and without a TCP/IP stack feature the same firmware, resulting common hardware specifications. Access Point (AP) functionality planned.

### ■ All-in-one wireless LAN modules

ROHM wireless LAN modules integrate all required protocols, including WPA-PSK, WPA2-PSK, and WPS. In addition, the built-in TCP/IP stack eliminates the need for a device driver, contributing to greater miniaturization.

### ■ Compatibility

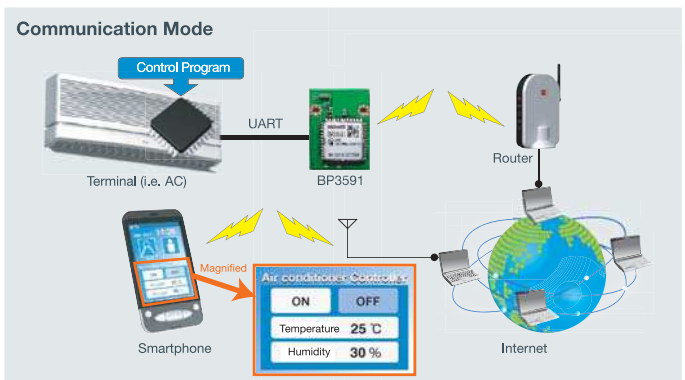

Item	Function	
ARP	Supported	
ICMP	Supports ping requests	
DHCP Client	Supported	
DNS Client	Supported	
TCP	Max. No. of Sessions	4
	Server	Supported
	Client	Supported
	Connect/Disconnect Notification	Supported
	Receive Timeout Notification	Supported
UDP	Max. No. of Ports	4
	Transfer	Unicast/broadcast supported
	Receive Timeout Notification	Supported
	Other	Data source/destination designations possible
HTTP	Settings Screen	Supported

● Regarding Japan's Foreign Exchange and Foreign Trade Laws

Since this product falls under the Foreign Exchange and Foreign Trade Laws, authorization for export is required. In addition, please comply with all relevant laws and regulations regarding the usage of this product overseas or by non-residents.

### ■ Terminal/Communication modes

Connect the BP3580/BP3591 between terminals via RS232C to enable simple wireless communication in 'terminal mode' or opt for more advanced operation in 'communication mode'.

### Applications

- AV equipment, industrial devices, sensor networks
- Wireless LAN devices connected to routers, including smartphones
- Devices that previously could not integrate wireless LAN due to insufficient microcontroller capability or prohibitive development costs

The content specified herein is for the purpose of introducing ROHM's products (hereinafter "Products"). If you wish to use any such Product, please be sure to refer to the specifications, which can be obtained from ROHM upon request. Great care was taken in ensuring the accuracy of the information specified in this document. However, should you incur any damage arising from any inaccuracy or misprint of such information, ROHM shall bear no responsibility for such damage. The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM and other parties. ROHM shall bear no responsibility whatsoever for any dispute arising from the use of such technical information. If you intend to export or ship overseas any Product or technology specified herein that may be controlled under the Foreign Exchange and the Foreign Trade Law, you will be required to obtain a license or permit under the Law.

The content specified in this document is correct as of 8th, Jun, 2011.
