**DESCRIPTION**

The BS 4-amp solid-state single inline (SIP) four-pin relays are designed for mounting on a printed circuit board. The relays offer built-in voltage protection and can withstand very high current overloads. The Series BS4 relays have a low zero-cross window. The compact size and triac output make the BS relay the perfect retrofit for electromechanical relays.

**APPLICATIONS**

- Interface applications
- Vending machines
- Light/lamp control
- HVAC controls

**APPROVALS**

All models are UL recognized. VDE approved.  
UL File Number: E128555.
