Panasonic Choke Coils

### Power Choke Coil

### Japan Singapore

## Series: PCC-F126F (N6)

Thin, compact and high power

Industrial Property: Utility models 3 (pending)

### ■ Features

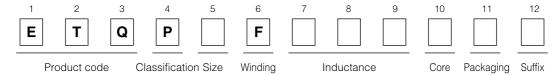

- High power type (Isat 20 A /100 °C)
- Thin type (5.7mm height)/SMD mount is possble
- Low leakage flux (El type /Center gap core)

### ■ Recommended Applications

- DC/DC converter for driving PC at high speed
- Thin type on-board power supply module for exchanger (10 to 40 W)

- Standard Packing Quantity
- 500 pcs./Reel

(Note1) Measured frequency of inductance is 100 kHz

(Note2) Concerning the definition of  $L_0$  &  $L_1$ , please refer to "next page"

(Note3) Saturation current (I sat) is the current value that inductance (L1) decreases to 80 % of initial value.

(Note4) Heat current ( I o) is the actual value of the current at which

the temperature rise of coil becomes 40 K when DC current is blown.

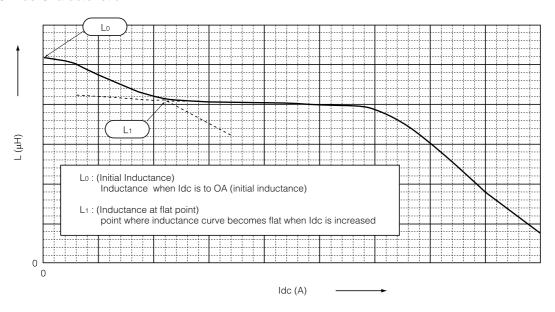

Actually, to decide the heat current, the temperature rise within the set shall be considered.

Concerning the heat current (I  $_0$ ) when ( $\Delta T$ ) was decreased more, please contact with us.
