

HSMF-C114

Surface Mount Tricolor ChipLEDs

Data Sheet

Description

The HSMF-C114 tricolor chip-type LED is designed in an ultra small package for miniaturization. It is the first of its kind to achieve such small packaging and be the thinnest package in the industry for tricolor package. With the freedom to have any combination of colors from mixing of the 3 primary colors, this will yield a wide variety of colors to suit every application and product theme.

The small size, narrow footprint, and low profile make this LED excellent for back-lighting, status indication, and front panel illumination applications.

In order to facilitate pick and place operation, this ChipLED is shipped in tape and reel, with 4000 units per reel. The package is compatible with reflow soldering and binned by both color and intensity.

Features

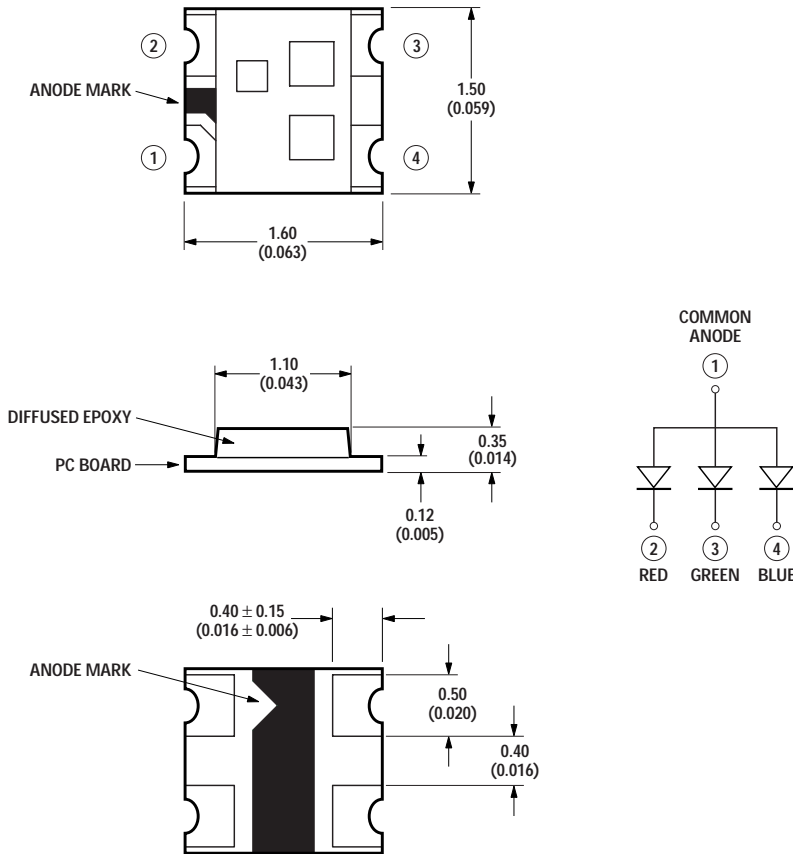

- Common anode
- Small 1.6 x 1.5 x 0.35 mm package
- Diffused optics
- Red/Green/Blue color combination
- Available in 8 mm tape on 7" diameter reels
- High brightness using AlInGaP and InGaN die technology
- Compatible with reflow soldering

Applications

- Backlighting
- Status indicator
- Front panel indicator
- Office automation, home appliances, industrial equipment

CAUTION: HSMF-C114 LEDs are Class 1A ESD sensitive per JESD22-A114C.01. Please observe appropriate precautions during handling and processing. Refer to Application Note AN-1142 for additional details.

Part Number	Luminous Intensity I _V ^[1] (mcd) @ 20 mA		Peak Wavelength λ _{peak} (nm)	Color, Dominant Wavelength λ _d ^[2] (nm)	Viewing Angle 2θ _{1/2} ^[3] (Degrees)	Luminous Efficacy η _v (lm/W)

InGaN Green	45.0	180.0	523	525	145	477
InGaN Blue	28.5	70.0	468	470	145	75

Notes:

1. The luminous intensity I_V is measured at the peak of the spatial radiation pattern which may not be aligned with the mechanical axis of the LED package.
2. The dominant wavelength, λ_d, is derived from the CIE Chromaticity Diagram and represents the perceived color of the device.
3. θ_{1/2} is the off-axis angle where the luminous intensity is 1/2 the peak intensity.

CAUTION:

1. The above optical performance specifications are valid in the case when single LED is lit up.
2. The above product specifications DO NOT provide any guarantee on color mixing, color consistency over time, or uniformity in luminous intensity when more than 1 LED is lit.
3. Please refer to Avago Technologies' *Application Brief AB D-007* for additional details/explanation on driving the part in parallel circuit.
