- 2:1 Input Voltage Range
- Operating Temperature Range: -40°C to +100°C
- Industrial Standard 24 Pin DIL
- Metal Case
- Low Profile 0.4 Inch
- Short Circuit Protection
- Temperature Shutdown

The WP06R SERIES is a family of high performance DC/DC converters that offers regulated output power over three input voltage ranges of 9-18V, 18-36V, and 34-75V and over a wide operating temperature range of -40°C to +100°C without derating.

The 200kHz switching frequency and flyback converter topology provide

optimum performance in a space-saving package. The design utilizes all surface mounted components, including magnetics, to provide enhanced reliability. All models will operate under no-load conditions, although a minimum load is specified for load regulation measurement purposes.

The converter is packaged in a metal

case for improved EMI shielding and immunity, and for superior thermal performance.

Applications include: Telecommunications, Battery Powered Systems, Portable Instruments, Process Control Equipment, Transportation Equipment and Distributed Power Systems.
